

Last Sunday, October 16<sup>th</sup>, the 3<sup>rd</sup> Run against breast cancer organised by the Acambi Association took place in Bilbao. More than 10,000 people got together in the area around the Guggenheim museum to support breast cancer research with their paces.

The funds collected from the t-shirt sales will support the research project “More steps in the fight against resistance to therapy in breast cancer”, from the laboratory of Dr Vivanco at CIC bioGUNE. The whole team participated in the event and presented a poster about breast cancer and the research project. Dr Vivanco cut the ribbon and received the symbolic cheque from Acambi. After the run, all participants zumba danced for almost 2 hours creating an atmosphere filled with energy, solidarity and hope.
